

Gems of Purest Ray Serene

SUCH jewels, described in Gray's "Elegy," will be seen at our store any day. Our engagement rings, for example, are the finest specimens of the lapidary's art. Birthday gifts for young and old of distinct style and quality. Wedding rings, too.

Chains and necklaces that are warranted not to tarnish.

Our sterling silver novelties are well worth your examination, including match cases, knives, paper cutters, pencils, etc. Fountain pens that write without blotting or staining the fingers.

Is your watch behaving badly? Bring it here and we will set it right.

ELITE JEWELRY CO., PRICE, UT.

PURELY PERSONAL

Mr. and Mrs. Joseph Woody of Lincoln, Neb., were Tavern guests during the week.

Miss Core Allison of Price was the guest of Mrs. L. A. Lee at Helper last week for several days.

Miss Vera Haymond spent Saturday and Sunday at Hiawatha, the guest of her brother, Mell Haymond, and family.

Peter Jeansonne is home from a Salt Lake City hospital, where he recently underwent an operation for appendicitis.

Mrs. F. E. Thompson has returned to Helper after a visit of several months at New Orleans and other places in the South.

Mrs. F. E. Woods departed last Monday for Brule, Neb., in response to messages that her mother was very ill and not expected to live.

P. Stinner, paymaster for the Utah Fuel company, was registered at the Tavern the first of the week, going and coming from Sunnyside.

Mr. R. E. Garrett of Los Angeles, Calif., is here on a visit to his parents, Mr. and Mrs. Jens Peterson, and a sister, Mrs. J. G. Cathaway.

George W. Kaul of Tooele, banker and newspaper man, was a Sunday visitor in Price, coming down from Helper, where he was on business Saturday last.

A. G. Smart of Provo, interested in the Simon-Nixon Lumber company at Price, was in the city on business last Monday and was a guest of the Tavern while here.

Miss Zina Baker, chief operator of the Mountain States Telephone and Telegraph company, has gone to Price for a few days in the interests of the company.—Provo Times, 24th.

Mrs. H. C. Hopkins of Mohrland was a guest of the Tavern last Monday, returning home from a visit with relatives in Mississippi. She was met here by her husband and went to Mohrland Tuesday.

T. C. Nutter of Nine Mile was transacting business in Price last Monday, being a guest of the Tavern. He is a nephew of Preston Nutter and has charge of the latter's Nine Mile properties and live stock.

Mr. and Mrs. Hermann Borsig of this city are to leave shortly for the Dixie country of Utah and to Southern California for an extended trip. They are going just for a general outing, says the former.

Mr. and Mrs. Ben F. Moss moved down from Helper to Price last Monday. The roads between the two towns are improved over what they have been and with a little work would be in excellent shape.

Mr. and Mrs. N. S. Nelson and daughter, Miss Irene, returned Tuesday from Long Beach, Calif., where they have spent the winter months. They had a pleasant time visiting with friends on the coast at Los Angeles, San Francisco and Long Beach.—Mt. Pleasant Pyramid, 24th.

Earl King is back in Price from Delta, where he has been employed for a time with W. H. Pace, formerly of Price, in the automobile business. He is not as yet decided whether he will return. That country and the town are each good, but nothing to compare with Price and Carbon county.

W. D. Livingston was down from Salt Lake City the last of last week and loaded two cars of nice grade Durham cattle at the Delta station from his big ranch west of town. Livingston intends to stock his ranch with purebreds and will make of it an ideal fine stock ranch.—Delta Chronicle, 24th.

Assistant Attorney General Iverson and Levi N. Harmon, both of Salt Lake City, were here Tuesday. They are former members of the old Price school board and appeared before the consolidated county school board on matters that are trying to be cleared up and which were entered into at a time when Iverson and Harmon were members of the local board.

Mohrland Folks Proud of Town

SEVERAL IMPROVEMENTS HAVE BEEN AND ARE BEING MADE.

Amusement Association Is Decidedly Democratic Under Supervision of General Superintendent Garvey—First Aid Workers Crack Organization—Social Conditions Excellent.

The Sun Special Service.

Mohrland, March 26.—During the last three years a great many improvements have been made in the United States Fuel company's mine at Mohrland. The writer is indebted to M. L. Garvey, superintendent, for his information and he states that the mining is done in the mine way of the best material in use in the United States, all rails being of sixty-five pound steel and the grades made to a uniform height. The underground haulage is done for motor and perhaps this is the only mine in Utah that such a system is in use, excepting probably at the Spring Canyon Coal company's property at Bitter. The motive power to use is all electric from the mine to the tipple and this is one of the latest designs. About ten years ago a new grade was made in the tramway from the mine to the tipple which is an immense improvement.

The company has also made other substantial improvements in the matter of the housing and general comfort of their employees and quite a number of new houses have been built. There is a handsome hotel in the lower town, which is managed by Mrs. A. G. Stewart, at which nearly all the single men working in and around the property board. Numerous other improvements are under consideration, such as the laying out of a park, the fencing off of the road and lots and planting lawns in front of the houses in the lower town. When such improvements have been completed the little city will present a decidedly inviting appearance. The sanitary conditions are excellent. Every family is provided with a garbage can and once a week this can is removed and dumped. Thus all doorways are kept continually cleared of all obnoxious substances. In order to discuss the conditions of the company's properties and to consider ways of improving means of safety, etc., the general superintendent, superintendents, mine foremen, assistant mine foremen, safety foremen, electricians and mechanics meet every month at Black Hawk. These gatherings are extremely interesting and promote loyalty and efficiency among the employees and bring the officials in close touch with them. These meetings are generally followed by a good lunch to which the chief clerks are also invited.

Amusements Are Plentiful.

Superintendent Garvey, who came to Mohrland about two years ago from West Virginia and who held a similar position in that state with the Davis Coal and Coke company, has a justifiable pride in another feature that is conducive to the social welfare and contentment of the camp—namely, the Mohrland Amusement association. This is an exceedingly democratic affair and any "doing" put off by the organization are free to all the workers of the camp. Master Mechanic J. B. Miller is president, Walter Von Elen, secretary, and Dr. P. H. Bailey, treasurer. Every employee is invited to become a member and if he is willing—the matter is not compulsory—he contributes a dollar out of his monthly pay or salary towards the fund of the association. This money is turned over to the officers of the organization and is used solely for the purpose of providing amusement for the whole camp. The band, the baseball club, tennis club, entertainments of various kinds, concerts and King Coal Comedy company are conducted by the parent organization. The association looks after the necessary charities and at Yuletide a Christmas tree is provided and every kiddie in town is given a present and there is on that date a gala performance of some kind to which the entire camp and any chance visitors are made welcome. The association at various periods gives a free moving picture show at the hall. This is done by paying an operator to come and present his attraction for which he is compensated by the organization and the mines, wives, daughters and sweethearts are admitted free of charge.

Japanese Tennis Players.

In regard to the baseball team, Leo Kinney, the manager, states that he will have practically the same team as he had last year and new plans are being made to give the people here plenty of the sport. There are two tennis courts built and supported by the association. One is in the lower town and the other is up at the mine and it will interest tennis lovers of that sport to know that at the mine court some of the best tennis seen in the state is played. The performers are Japanese and invariably they put it all over their American workers when a match game is pulled off.

The King Coal Comedy company is a great attraction when it occupies the boards at the local hall. The "company" gets off some good hard stuff and when it feels that a necessity arises that someone should be roasted—well, the roasting is done to a turn. Leo Keeney is manager and Roy Manchester the singing director.

Mohrland's twenty-piece band is an organization of which the whole camp is proud. Charles Strans is the director and he is putting a great deal of honest and conscientious effort into his work and the band is rapidly improving under his guidance. Fred Von Elen is also an earnest and capable worker and the Mohrland orchestra claims to be second to none in the district.

In Mohrland, together with their families, are indeed to be congratulated on having such public spirited citizens and fellow workmen, who are willing, without compensation, to devote a large percentage of their time to general social and moral welfare of the camp.

First Aid and Rescue Team.

The officials of the United States Fuel company are exceedingly proud of the Mohrland First Aid and Mine Rescue association, and justly so, as nearly all its members belong to the American Mine Safety association. In order to belong to the latter it is necessary to hold a United States government certificate in first aid and mine rescue work. In fact last year the team made an excellent showing in all contests, and it is considered one of the banner teams of the state. During the state fair at Salt Lake City last fall the Mohrland boys gave exhibitions twice daily at the fair grounds and a number of demonstrations of the use of the Draeger breathing apparatus were given for the benefit of the Salt Lake City fire department at the request of Chief Firewater. The men who made up that team were A. G. Stewart (deceased), C. L. Leavitt, D. C. Leavitt, Frank Jones, Francis Grundig and Oscar Wallander. Besides the members of this team who are all in Mohrland there are five other teams, including a boy's team, none of whom are over the age of twelve years.

Mohrland people are also proud of this boys' organization. Last fall Hiawatha this team of youngsters actually took third prize in the competition, with all teams contending to have the honor of making the trip to San Francisco. This speaks volume for their training and reflects no credit upon their instructors.

It would be well to mention that the Mohrland team was active during active service during the Black Hawk mine fire, which occurred February and March of 1916. In this configuration, which kept burning fifty-nine days, Mohrland fought and most of the time three teams in the thick of the battle against the flames and it was exceedingly trying work. It was at this time Sun readers will remember that Grant Miller of Black Hawk lost his life. First aid practice is held every Thursday evening in the amusement hall and also on the same day drill in mine rescue work is held in the mine under the direction of Arthur Bonnison, safety superintendent for the United States Fuel company. Late arrangements have been made with the Emery county board of education to give first aid instruction in the Mohrland school and in this work not only are the boys instructed, but the girls are given the same drill. In fact, the first aid follows a most earnest and capable set of men and they should be accorded all due honor, as theirs is a task that is truly noble and they are liable at any moment to be called upon to perform the most arduous and heroic tasks. Occasionally they have a little sociable time to themselves, when the organization holds a banquet at the local hotel.

grain, to say nothing of other expenses. The farmers have made money. More than one man sold hay four years old. They all cleaned up, in fact some of them were so eager to clean up that they sold more than they could really spare and are now turning their stock out to pasture. The stockmen made money. Some of them will even admit it. There is at least one and a half pounds of wool more on the back of every sheep than there would have been if the sheep had not been fed. The wool is better. The sheep fell better.

Last fall Edward Samuels, mayor of Vernal and one of the leading sheepmen of the basin, informed the writer that he expected to feed three thousand head this winter, snow or no snow, as an experiment. The report comes from Vernal in the effect that the experiment was so successful that Mayor Samuels has decided to feed his sheep hay for six weeks every winter. Some of the men who had to do with the experiment said that
